CORE COMPETENCIES

- **Strategy & Growth:** Product vision, value proposition, positioning, lifecycle, market expansion, go-to-market
- **Discovery:** Customer discovery & interviews, problem validation, MVP definition, prototyping, user journey mapping, UX/UI
- **Delivery & Metrics:** Outcome-based roadmaps, RICE prioritization, backlog, Agile/Scrum, OKRs, KPIs, NPS/CSAT
- **Technical fluency:** SaaS architecture, microservices, APIs, AI agents & workflow automation, AI-assisted prototyping
- **Compliance by design:** Software / computer system validation, risk management, ISO 27001 & ISO 9001, regulated environments
- **Leadership:** Cross-functional & multicultural team leadership, executive and client stakeholder management

EDUCATION & CERTIFICATIONS

- Product Management
- Postgraduate Degree in Quality Engineering – UTN (Argentina)
- Industrial Engineer – Universidad del Norte (Colombia)
- Software Quality Assurance Specialization
- ISO 9001 / ISO 27001 Lead Auditor

TOOLS

Jira | Confluence | Claude / Claude Design | Miro | Asana | MS Project

LANGUAGES

- Spanish (Native)
- English (Intermediate)

PROFESSIONAL SUMMARY

I'm a Product Manager with more than seven years in pharma tech, where I've learned to build B2B SaaS products that customers rely on every day and that still pass a regulatory audit. Today I lead a product at Verifarma, used by users across Europe and Latin America, and a cross-functional team of about 20 people. My background in quality and compliance shapes how I work: I talk to customers early, make decisions with data, and bring Engineering into the conversation from day one. Lately I've been bringing AI into how our team builds products, and in my own HealthTech venture I'm taking an idea from discovery to an MVP that real customers are testing today.

PROFESSIONAL EXPERIENCE

HealthTech SaaS Venture (own Project) (Feb 2026 – Present)

- B2B HealthTech SaaS (web; mobile on roadmap) that addresses Colombian Ministry of Health regulatory requirements (Resolution 3100/2019, health service provider accreditation) for independent physicians, IPS and EPS.
- Led product discovery with target users to map compliance pain points; owned functional design, MVP scope and the MVP prototype.
- Built the MVP with an AI-assisted product workflow and a lean team (software architect + full-stack developer).
- Currently in customer validation with 3 pilot clients, iterating on feedback toward product-market fit.

Verifarma (PharmaTech B2B SaaS) (2022 – Present)

Product Manager / Business Unit Lead

- Lead the business unit, own vision, positioning and value proposition for a mission-critical B2B SaaS platform serving 3,000+ concurrent users.
- Scale the business unit across Europe and LATAM, with most of the revenue now coming from international markets and LATAM as the main growth market.
- Built and own an outcome-based roadmap aligned with company OKRs, prioritizing by business impact and customer value; run continuous discovery to validate problems before committing engineering capacity.
- Drive AI & automation initiatives across the product lifecycle with human-in-the-loop review: test-case design time cut by 85% (measured; ~45 h saved per month) and user-story writing by ~70%.
- Introduced an AI support-ticket agent (avg. resolution 6.0 h to 4.1 h, measured), one-click releases and release notes, ~75% faster scope documents and ~50% faster prototypes with Claude Design.
- Lead a cross-functional team of ~20 (Business Analysis, Engineering, QA, Customer Experience) using Agile/Scrum.
- Drive the platform's architectural redesign toward a scalable SaaS/microservices model
- Led the full UX/UI redesign, improving usability, performance and brand perception
- Rebuild customer trust through customer-centric initiatives, increasing retention/renewals

Verifarma (2019 – 2022)

Quality, Continuous Improvement & Software Validation Manager

- Designed and built the end-to-end software validation process for a regulated pharma SaaS product
- Launched a software validation service line, creating a new revenue
- Defined the annual quality strategy and risk frameworks; led ISO 27001 certification and the ISO 9001 upgrade, embedding compliance into the delivery lifecycle.
- Started as Quality Manager (2019–2020): achieved ISO 27001 certification and managed KPIs and customer satisfaction systems that later informed product decisions.
